Architecture	Bauart Architekten und Planer AG
Project type	Education and research
Construction type	Modular construction
Services	General contractor services (GC)
Construction	2012-2019
Locality	Zurich
Country	Switzerland

Functional modular buildings for everyday school life

Four schools in Zurich received new ZM10 school rooms in 2019. A total of 110 timber modules were assembled into two-storey and three-storey school pavilions. All of the new modular school buildings have optimal building services engineering and an extra-large kitchen was installed in one location.

Blumer Lehmann has been building temporary school buildings in timber modular construction for the City of Zurich for 20 years. For the four current school buildings, we built the robust ZM10 model refined by 'Bauart-Architekten' in line with the Minergie Eco standard. Thanks to the high degree of prefabrication in our factory, the structures are quickly assembled on site and schedules and costs can be precisely calculated. In Zurich, our pavilions are generally used for 10-15 years on the same site before being redeployed at another location.

ZM10 Zurich modules

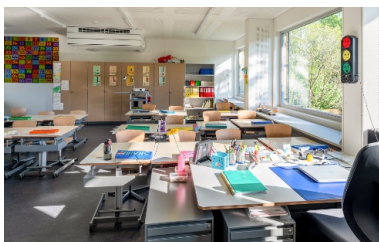

Zurich, CH

Three-storey Züri-Modular - the temporary pavilion at the Sihlweid school in Zurich.

The school pavilion's different levels are accessed via an external staircase.

The spacious classrooms in the ZM10 school pavilion get plenty of daylight thanks to the large windows.

Furnished classroom in the school pavilion. The timber gives the space a welcoming atmosphere.
